

Sturgeon Life Cycle Maze

Directions: Help the sturgeon eggs hatch into larvae, grow to juvenile sturgeon, and then to mature adult sturgeon! *Bonus: How many years does it take for a sturgeon to mature?* _____

The maze is a complex grid of black lines on a white background. It contains five rectangular boxes, each representing a stage in the sturgeon life cycle. The boxes are arranged as follows: 'START EGGS' is in the top-left corner; 'LARVA' is in the middle-left; 'JUVENILE' is in the top-right; 'SUB-ADULT' is in the bottom-center; and 'FINISH ADULT' is in the middle-right. The maze paths connect these boxes in a way that allows for a path from 'START EGGS' to 'LARVA', then to 'JUVENILE', then to 'SUB-ADULT', and finally to 'FINISH ADULT'. The 'START EGGS' box contains a cluster of black dots. The 'LARVA' box contains a small, two-part larval illustration. The 'JUVENILE' box contains a small fish illustration. The 'SUB-ADULT' box contains a medium-sized fish illustration. The 'FINISH ADULT' box contains a large fish illustration.
